

TR5102 Proximity Speed and Phase Reference Transmitter

TR5102 is a cost-effective solution for monitoring the speed on your balance of plant machines. TR5102 combines the proximity probe driver and the signal conditioning circuit into one package. It will work with proximity probe and extension cable as a system.

Features

- ✓ Does not require proximity probe driver
- ✓ Buffered output/GAP available for portable vibration analyzer
- ✓ Work with other manufactures 5mm, 8mm and 11mm probes
- ✓ Aluminum cast case with epoxy potting for hazardous area and reliability
- ✓ Same size as a proximity driver
